M135

Ref. 18767

The calibration test has been carried out on 6.03-300mm barrel with fitting cylinder. Zero Hop-up with 0.20g BBs.

- **Military specification steel spring** – SiCr, Best possible steel for springs
- **Progressive coiling** – provides a soft start which eases stress on both mechanical and electrical parts
- **Closed and grinded ends** – stable straight ends minimizes side bending which reduces ROF loss
- **Pre-compressed** – greatly reduces power loss from initial shrinkage
- **Black zinc plating** – corrosion protection which does not impair spring performance
- **Full specification control** – secures exact same specification at every spring
- **Colour coding** – for easy indication of individual spring grade
